

conducted by 3 members of our study team. All collected data were filtered for content moderation during the ASR annotation stage. The generated utterances abide by the OpenAI content policy.

This work intends to have a positive impact on the society as the goal is to design a system that can assist human to complete tasks in a more personalized way. While this work focuses on building baselines using collected data, there is the potential for the future models to be misused, or offer ill-intended guidance to human. We hope future works take responsible AI into considerations while designing human centered interactive systems.

Acknowledgements

This work was supported by the DARPA PTG program HR00112220003 and NSF IIS-1949634. We would like to thank Jason Corso, Enrique Dunn, Jeffery Siskind, Chenliang Xu, and the entire MSPR team for their helpful discussion and feedback. We also would like to thank the anonymous reviewers for their valuable comments and suggestions.
